Domain Name Services Requested (please check all that apply)

DOMAIN REGISTRATION: **\$20.83 per year and up.** NOTE: .us domains have a 2 year initial registration term. .info, .biz & .tv domains may cost more than \$20.83/yr. LavaNet will get your OK if cost will exceed \$20.83/yr. Note that .com, .org, and .net are firmly priced at \$20.83/yr. Renewal notices are sent via email to the billing email address specified for this account. Customer is responsible to keep contact info current. Failure to renew can result in the loss of your domain.

DOMAIN HOSTING ONLY: **\$25.00 setup/\$25.00 per year.** (Getting web hosting from LavaNet? Skip this section and go to "Web Hosting Services" above. The hosting fee is included in pricing for web service.) Includes backup DNS, optional pointing of DNS records & up to 50 domain email aliases (specified later in this form). Does **not** include space for hosting a web page! Use only if you need domain-based email or record pointing, but do **not** need web hosting services.

Optional Domain Record Pointing with DOMAIN HOSTING. NOTE: Some record pointing **requires the cooperation of the host you are pointing the domain record to.** Customer is responsible for making these arrangements.

Point A (web) record to _____ (IP address)
No fee for pointing domain web record to a number based web server. Fees of \$18 .75 per year and up apply

Point MX (email) record to _____ (IP address)
Pointing an MX record moves responsibility for your domain email from LavaNet to whatever third party you choose.
No technical support is provided for third party email servers, though paid consulting services can be contracted.

LavaNet Domain Registration Record Creation Form for NEW Domains Only

– Do not fill out if transferring an existing domain! –

The information you provide below will become part of a publicly accessible database. Domain records are "locked" to prevent domain slamming/theft. Only authorized parties for this application's Master Agreement may initiate an unlock. The domain name will be unlocked (generally by the next business day) following positive identity verification.

0. Domain name covered by this form:

Registration Period (1-10 yrs.)

_____ (max 63 characters including TLD extension)

1 2 3 4 5 6 7 8 9 10yrs
(2 yrs initial period required for .us)

* First Name: _____ Last Name: _____

* Organization Name: _____

* Street Address (include city, state, zip): _____

*Phone: (____) _____ (optional) Fax: (____) _____

*Email: _____

*: required fields

How would you like to handle email at your domain?

Important note: if transferring an existing domain name to LavaNet, any email addresses or web services you had before MUST be set up in advance of the transfer or they will cease working! Please call and let us help plan this move with you.

Domain Name: _____ Authorizing Party: _____

Role Accounts: Not required, optional. Certain email addresses cover technical and routing details of your domain name, or abuse issues. LavaNet receives any email directed to the following addresses by default.

Role Address:	Send a copy? (check if YES)	If yes, please tell us what email address to send it to.
root@yourdomain.com	_____	_____
postmaster@yourdomain.com	_____	_____
abuse@yourdomain.com	_____	_____
news@yourdomain.com	_____	_____
usenet@yourdomain.com	_____	_____

Domain email aliases: These are not email boxes! Aliases route email to mail boxes you specify here. 50 domain email aliases are included with your DNS service. These can be submitted at any time or all at once. After fifty aliases are reached, a one-time fee of \$10 applies per additional block of 50. Photocopy this page to add more than ten aliases at a time. To decrease spam, the default is to return as undeliverable any email sent to addresses not specified below.

OPTIONAL "Catch-all" address: Delivers mail for unspecified email addresses to a single mailbox. Due to the tactics of spammers, expect a huge amount of spam. This may overflow your email box and even prevent the delivery of valid email. Recommended only for users experienced in aggressive maintenance of the catch-all destination.

Yes, I understand the risks and do want a catch-all. Send all unspecified email for my domain to:

	email name	at	your domain	forward to	POP address	at	some ISP
example:	info	@	yourdomain.com	--->	joebogus	@	lava.net
1.	_____	@	_____	--->	_____	@	_____
2.	_____	@	_____	--->	_____	@	_____
3.	_____	@	_____	--->	_____	@	_____
4.	_____	@	_____	--->	_____	@	_____
5.	_____	@	_____	--->	_____	@	_____
6.	_____	@	_____	--->	_____	@	_____
7.	_____	@	_____	--->	_____	@	_____
8.	_____	@	_____	--->	_____	@	_____
9.	_____	@	_____	--->	_____	@	_____
10.	_____	@	_____	--->	_____	@	_____
